# PVE'S Features & Benefits

- No pit excavation, hoist-way, or machine room required
- Installation within one to three days
- Two to five stops for residential, marine, and stage applications [50ft. (15m) total rise]
- Ideal for new and existing homes due to the minimal footprint required to accommodate the structure
- Self-supporting structure: the elevator is capable of freestanding on any level ground surface
- “Green Elevator:” minimal energy consumption required during ascent and no energy necessary for descent
- Modern design allows 360° visibility without cables or pistons that block vision
- Minimal maintenance: no lubricants or regular service required
- Absolute safety: in the event of a power failure, the elevator cab automatically descends to the lowest level and the electro-mechanical door opens to allow passengers to exit
- 220Volt single phase service required for elevator operation and all cabin electric circuits are 24 volts
- Extremely smooth starting and stopping operations
- ASME A17.7 Code Compliance Certified

## Components

There are three main components to the transparent, self-supporting vacuum elevator:

### Exterior Cylinder

Made up of an aluminum frame and polycarbonate panels.

### Elevator Car

Made of steel, which houses the brake and safety mechanisms along with the proprietary seal located on top of the car.
